WINCHESTER ENTRY SYSTEM REVIEW

You'll enjoy the highest quality craftsmanship through the years as with our superior entry door system. Every door creates a stunning appearance while protecting your most valuable possessions - your home and your family.

Our sophistication and distinction will turn your ordinary doorway into a ...

PICTURE PERFECT GRAND ENTRANCE!

Platinum Reflections PR62, PRSL63; Transom; Satin Nickel Hardware

CUSTOM DESIGNED BY YOU

A wide array of styles, sizes and colors is Winchester's answer to providing you the choices to create a timeless expression from your home's first impression - its' entry way! We recognize that our customers, each and every one, are different in their likes and dislikes. Therefore, standard doesn't exist in the way the Winchester Replacement doors are ordered. You choose what you like and we build it the way you want it! Nothing is standard except the

DISTINCTIVE CRAFTSMANSHIP

The only entry your home deserves is Winchester's ultimate, long-lasting replacement door system. It's an open and shut case with a super-lasting impression. Great looks, outstanding security features, old-world style craftsmanship, distinctive styles, and a variety of finishes and hardware all complemented with custom manufacturing and precision installations.

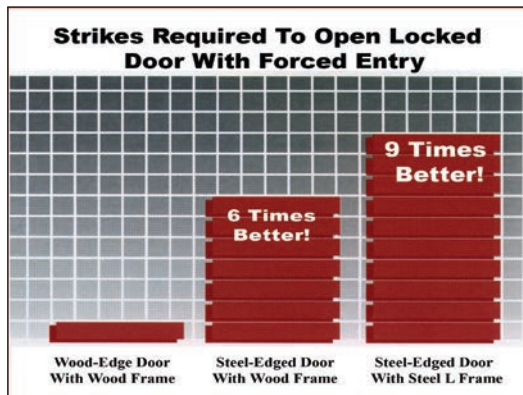

SUPERIOR PERFORMANCE

Design the system of your choice. Superior technology guarantees you years of operating ease, dramatic energy efficiency and maximum security. Your protection and comfort are blended into every one of our custom replacement door systems.

OUTSTANDING SECURITY

Your security means everything to us. Special lock preparation reinforcements, 18-gauge steel frames, 12-gauge locking-pin hinges mounted to an additional 12-gauge steel reinforcement plate and 22-gauge galvanized steel skins equals security designed to be the best. Every door has a 50-year transferable warranty that includes an exclusive three-year glass breakage replacement policy and five-year finish coverage.

ULTIMATE PROTECTION

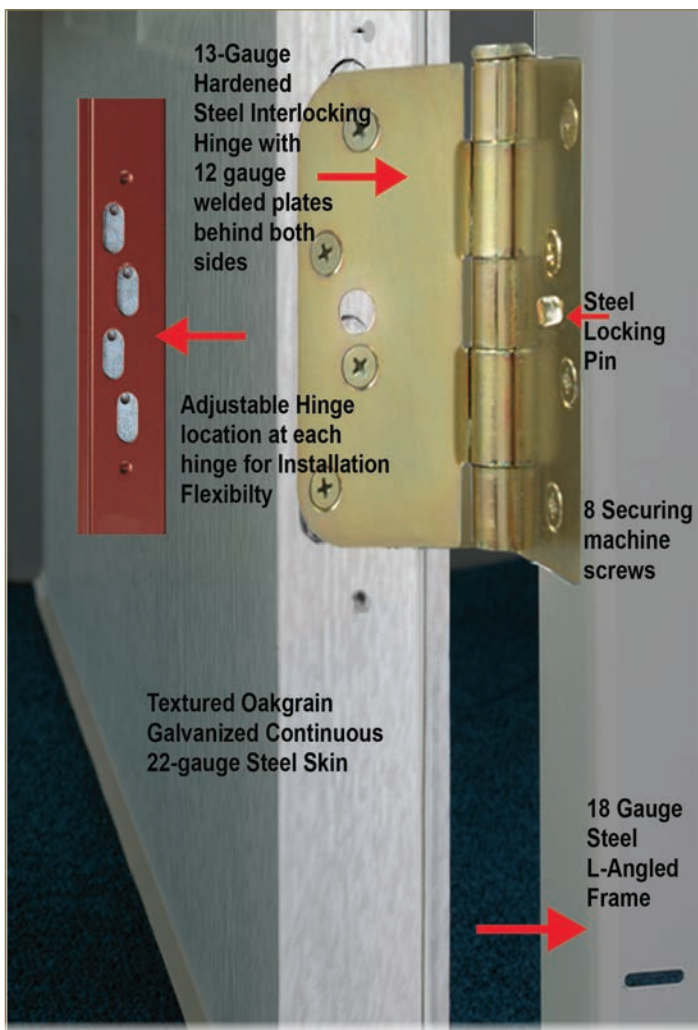

Statistics show that most home burglaries occur through a door! It's no secret that wood doors make forced entries easy.

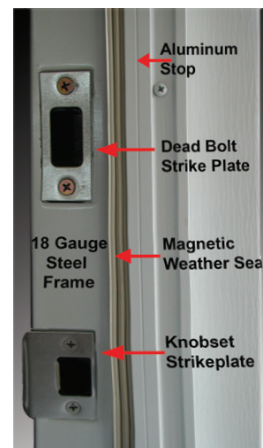

Tests show that our 18 gauge steel frame replacement door out-performed a typical wood configuration by nine times. The added time required to attain a forced entry through our ultimate replacement door system would be enough to discourage most perpetrators.

SUPERIOR SECURITY FEATURES

- 22-gauge heavy textured steel skin with precision finished steel angled edges on all four sides – oakgrain texturing technique enhances this strength.
- 18-gauge reinforced steel "L" angled painted frame
- Interlocking yellow chromate, 13-gauge rust-free non removable interlocking hinges are reinforced by 12-gauge steel plates that are welded to the steel frame and door
- Standard with steel five-pin tumbler lock and dead bolt
- Unique thermal and security lock preparation
- Heavy duty locks with full 1" bolt and hardened steel pin that resists being sawed through or jimmied
- Extra wide angle security peep site lens viewer
- B-Labeled Fire Rating

UTSTANDING THERMAL PERFORMANCE

- 2.2 pcf. poured polyurethane chemically bonds to the steel to create the highest resistance to cold conduction available – insulates five times better than solid wood doors
- Draft-free top and side magnetic refrigerator-like weather stripping assures a positive closed seal
- Compression stop TPE long lasting rubber on hinge side

- Full width adjustable extruded aluminum/ composite threshold ensures a good tight fit for excellent energy efficiency. Eliminates rotting, warping or deterioration while resisting air and water infiltration all composite substrates and synthetic adjustable cap and nosing
- Slide on rubber bulb seal creates an extreme weather barrier and is easily replaced should wear and tear dictate it.

SPECIAL FEATURES CREATE SPECIAL PERFORMANCES!

Heather H 123; HSL 126; Mahogany Stain

High-impact door lite frames are made with superior heat resistant material to prevent warping or cracking under normal conditions. Available in paintable or stainable finishes to complement your door style. Match your door color or add a contrasting or similar color or stain.

Choose from a variety of maintenance-free molded frame and frame/grid styles that provide ease in two-tone painting or staining. Grid patterns are molded on glass frames on both interior and exterior sides. Grids create a divided glass look with insulating glass being internal.

Scientifically formulated finish limits ultra violet light discoloration. Maintenance-free PVC doorlite frame material is a rot-free alternative to wood. Special wood graining texture maintains the beauty that wood brings but eliminates the troublesome maintenance that by nature goes hand-in-hand with wood.

Optional all-year heat reflective low emissivity glass is available in some Traditional, Classic and Rain Glass door models. Low-E increases your door's energy efficiency without blocking your outside view.

FROM TRADITIONAL TO DESIGNER GLASS STYLES

Traditional T9; TSL13; Grecian Green

MIX OR MATCH INTERIOR & EXTERIOR COLORS

Beauty and precision craftsmanship are engineered and designed into every door system to enhance the look and value of your home. Special colors and styles allow you to make your door different than the rest. A lifetime of beauty and security exists in over 100 styles. Matching sidelites let you complement your existing opening or add to it with an amazing touch of elegance.

Unique character – from traditional to designer, there's a style that will add unique character and value to your most valued possession - your home! Our ultimate replacement door resists warping, rotting, shrinking and swelling. Feel comfortable and secure with a unique door system that's designed to last a lifetime while always protecting you from weather and other unwanted elements.

Ambassador A52; ASL53; Polished Brass Decorator Handle

Our delicate hand staining process adds highlights to stamped embossments while assuring a deep penetration into the graining developed during our stamping of the galvanized steel skins.

Finishing with a precision hand-buffed shimmering clear coat creates doors with a hallmark of character for years to come.

Painted white interior finish with mahogany stain finish on exterior. Polished brass decorator handle on Classic embossed 6-panel door.

DECORATOR GLASS WITH ULTIMATE STYLE

Our handmade glass is created by the refraction of light through each glass panel. Highly skilled technicians assemble hand beveled glass accented with a variety of unique options by precisely mitering, cutting, and soldering each component to achieve individual artistic patterns.

These delicate panels are then insulated between two sheets of tempered double strength safety glass to create our triple-glazed, airtight energy efficiency seal.

Stunning beauty with stately performance is guaranteed through our strict quality control methods.

Charm and individual character result in every hand-made designer glass door lite.

**SEALED BETWEEN
TEMPERED SAFETY
GLASS TO PRESERVE
THE BEAUTY!**

Solitaire Double Door; ST150Z*

All doors can be configured to be double doors. Center astragal releases easily for opening of stationary side to provide an extra large opening area (60"-72"). Great for deck and porch entrances.

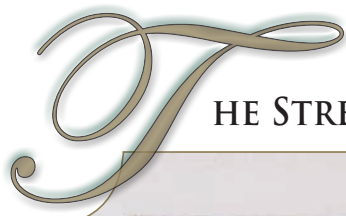

**WINCHESTER CREATES
AN AWESOME
FOCAL POINT FOR
YOUR HOME!**

DESIGNING YOUR NEW ENTRY DOOR IS EASY WITH WINCHESTER'S WIDE CHOICE OF COLORS - PAINTS & STAINS!

Individual preference is accentuated by you having the ability to mix and match your interior and exterior colors. You can even choose to have the one side painted and the other side stained, as well as having your door glass trim painted a different color.

Window colors are available to match or compliment door color choices!

Our specially formulated color spectrum includes the following choices:

- | | |
|------------------------|-------------------------|
| • Alpine White | • Grecian Green |
| • Egg Shell Cream | • Teal |
| • Honey Bee Yellow | • Polymer Blue |
| • Dormer Brown | • Jay Blue |
| • Homestead Brown | • Bar Harbor |
| • Chocolate Chip Brown | • Fashion Gray |
| • Allspice | • Jet Black (trim only) |
| • Mason Brick | • Oak Stain |
| • Ember Red | • Walnut Stain |
| • Burgundy | • Mahogany Stain |

Note: Colors represented here are not meant to represent "actual" door colors. Refer to printed door color cards or actual color chips to choose your colors.

Industrial grade finishes are applied by skilled factory experts. The process begins with the electrostatic bonding of the steel, inside and out. This technique permits adhering of primers and multiple coats of specially formulated paints and stains. Whichever you choose, it will look superior for years to come. Winchester's exclusively formulated, three-part door paints and stains have the following additives:

- High-resistance agents for strength against scratches, chips and marring
- Low-gloss protective additives for a long-lasting sheen
- Sunscreen additives protect from harmful ultra-violet rays
- Mix and match your interior and exterior finishes, as well as door and trim colors
- Solar Heat Reflective finishes and application process allows for exterior of vinyl windows to be color matched with steel door colors

Sold Exclusively By:
